

HOMEWORK REMINDER

FELIPE WALKER, LÍVIA OLIVEIRA, VINÍCIUS ESTEVES

THE PROBLEM

Students forgetting about homework

Many students have problems when trying to remember about their homework.

THE SOLUTION

A website to register the user's homework logs with buttons to mark 'Pending', 'Done'. It is very important because it's a common problem that affects all students.

HOW IT WORKS

First, the student safely logs in with their personal username and password to open the main menu page. This clear main dashboard is the helpful starting point for everything they need to do for school. This digital layout is very simple, clean, and easy to read. Then, they can quickly add all of their daily homework to the site. They do this by typing the exact name of the school subject and writing short, simple details about it in the empty description box.

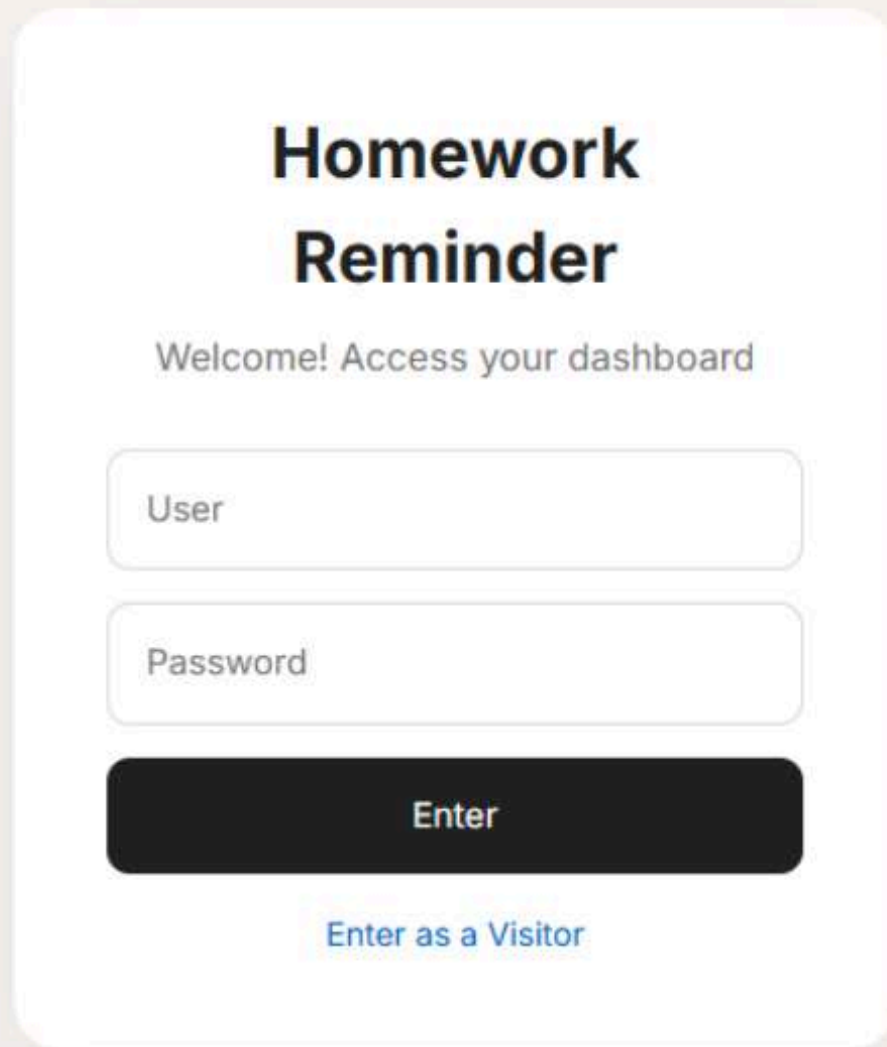

Next, the student clicks the big 'Save' button located at the bottom of the screen. This quick action keeps all the new information safe, private, and secure in the database system. It takes only one second to complete this action. After that, the website automatically gives the homework a gray 'Pending' tag. The system puts it directly on their main list of active tasks for school.

Finally, the system marks the tasks with helpful priority colors to help them plan. Five days before the deadline is Green, three days is Yellow, and one day is Red. These bright colors remind the student about the homework before the real End Date arrives. This smart visual system avoids stress completely. When the homework is finished and ready, the student clicks a small check button. The text immediately changes to "Done" with a bright blue color to show it is perfectly finished and completed. This gives the student a great feeling of success.

THE INTERFACE

Login Screen

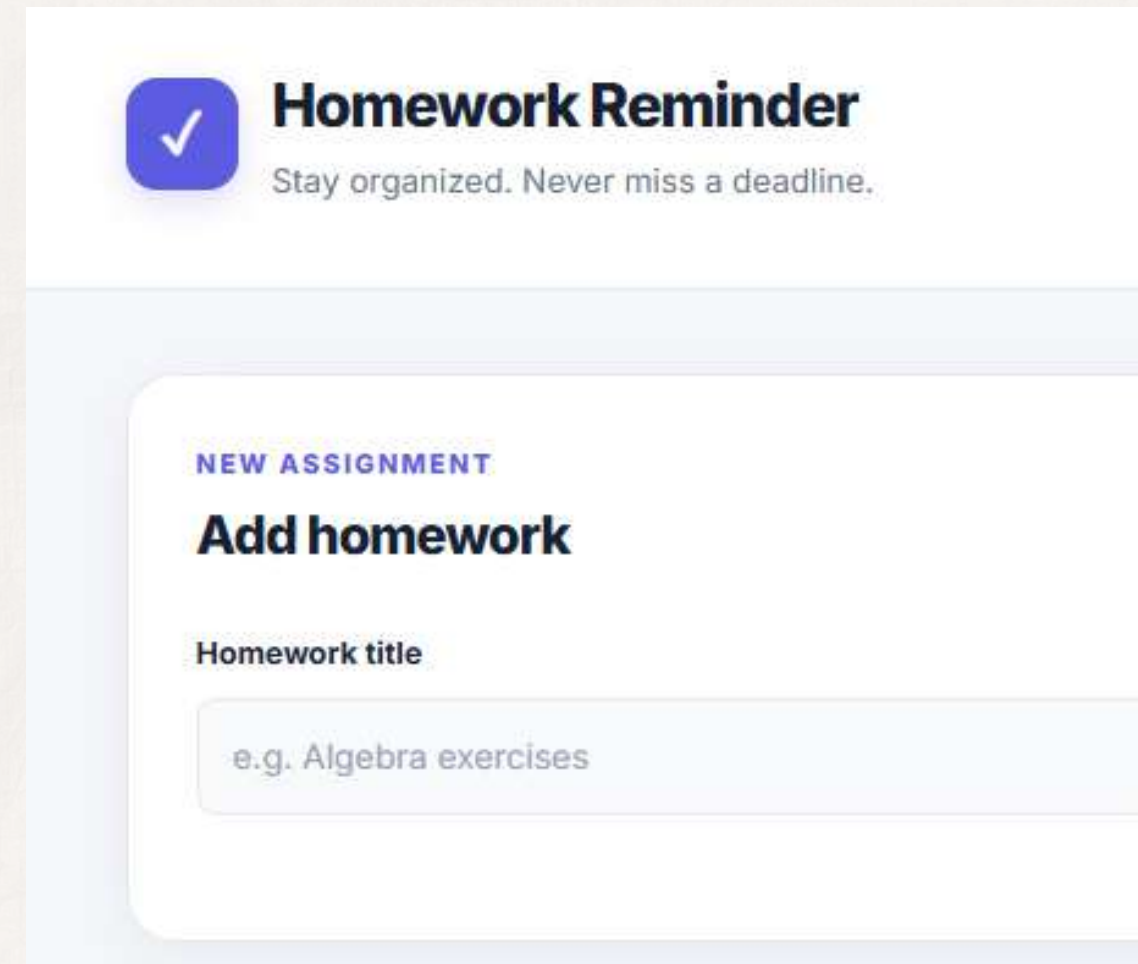

01.

A login screen mockup with a white background and rounded corners. It features the title "Homework Reminder" in bold black text, followed by the subtitle "Welcome! Access your dashboard". Below this are two input fields: "User" and "Password". A large black button with the text "Enter" is positioned below the input fields. At the bottom, there is a link that says "Enter as a Visitor".

Add Homework Screen

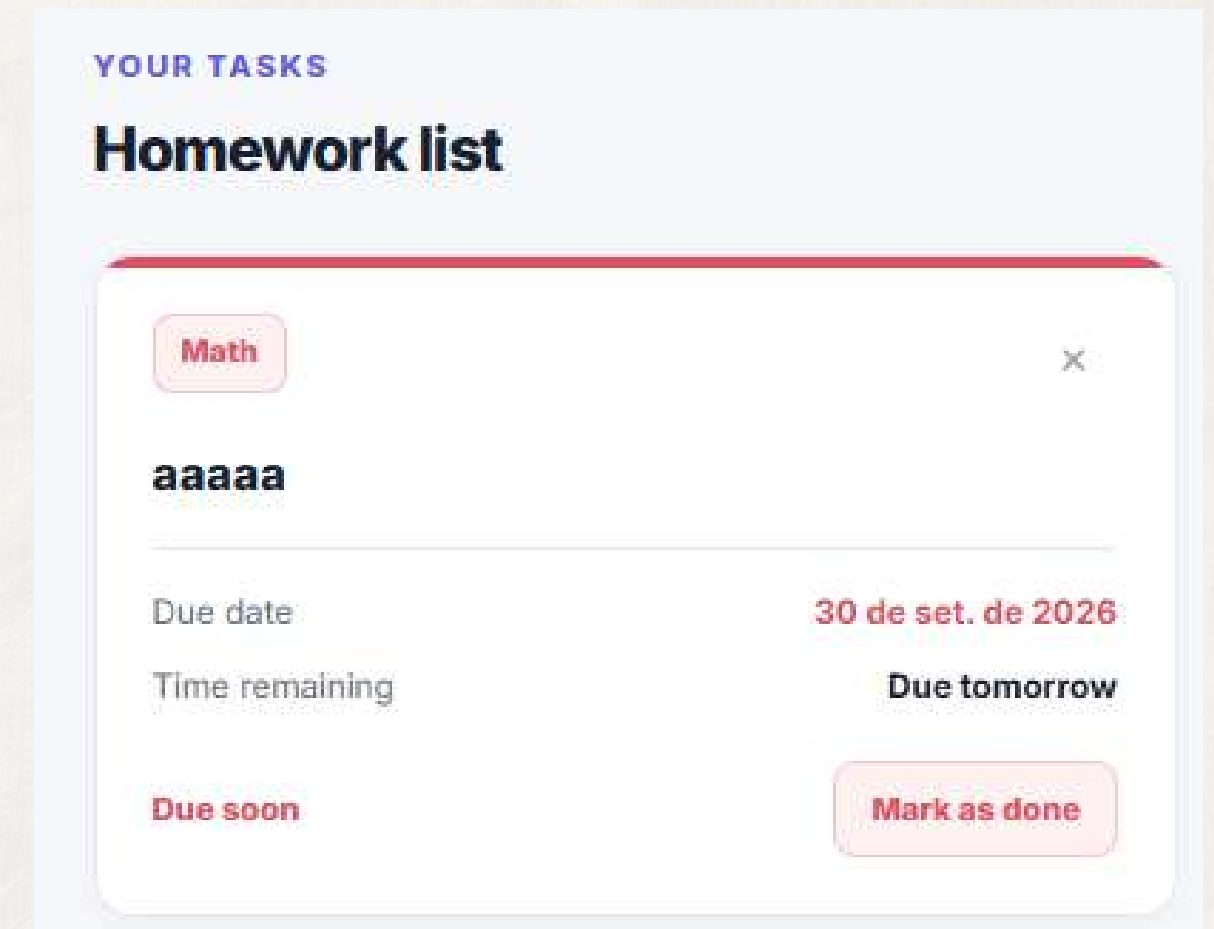

02.

An "Add Homework" screen mockup with a white background and rounded corners. It features a purple checkmark icon and the title "Homework Reminder" in bold black text, followed by the subtitle "Stay organized. Never miss a deadline.". Below this is a section titled "NEW ASSIGNMENT" in purple, followed by the title "Add homework" in bold black text. There is a label "Homework title" and a text input field with the placeholder text "e.g. Algebra exercises".

Homework List Screen

03.

A "Homework List" screen mockup with a light blue background and rounded corners. It features the title "YOUR TASKS" in purple, followed by the title "Homework list" in bold black text. Below this is a card with a red border and a white background. The card has a title "Math" in red, a subtitle "aaaaa" in bold black text, and a "Due date" of "30 de set. de 2026" in red. There is also a "Time remaining" section with the text "Due tomorrow". At the bottom of the card, there is a red button labeled "Mark as done".

```
/* Reusable colors, shadows, sizes, and animation settings. */
```

```
:root {  
  --color-background: #f5f7fb;  
  --color-surface: #ffffff;  
  --color-surface-soft: #f8fafc;  
  --color-text: #172033;  
  --color-text-secondary: #687386;  
  --color-text-muted: #98a2b3;  
  --color-border: #e6eaf0;

  --color-primary-soft: #eeefff;  
  
  --color-green: #22a06b;  
  --color-green-soft: #e9f8f1;  
  --color-green-border: #bcebd5;  
  
  --color-yellow: #d58b00;  
  --color-yellow-soft: #fff7df;  
  --color-yellow-border: #f3dda0;
```

CSS

```
// Lets visitors enter without an account.  
document.addEventListener("DOMContentLoaded", function () {  
  const visitorButton = document.getElementById("visitorButton");  
  
  if (visitorButton) {  
    visitorButton.addEventListener("click", function (e) {  
      e.preventDefault();  
  
      // Hide the login screen.  
      document.getElementById("loginScreen").style.display = "none";  
  
      // Show the project screen.  
      document.getElementById("projectScreen").style.display = "block";  
  
      // Save the visitor session.  
      localStorage.setItem("userRole", "visitor");  
    });  
  }  
});
```

Javascript

```
<!-- Load the page styles. -->  
<link rel="stylesheet" href="style.css" />  
</head>  
<body>  
  <!-- Login screen shown before the dashboard. -->  
  <div id="loginScreen">  
    <div class="login-card">  
      <h1>Homework Reminder</h1>  
      <p>Welcome! Access your dashboard</p>  
      <p>Your first login Creates your account!</p>  
      <input id="loginUser" type="text" placeholder="User" />  
      <input id="loginPassword" type="password" placeholder="Password" />  
      <button id="loginButton" type="button">Enter</button>  
      <a  
        href="#"  
        id="visitorButton"  
        style="display: block;  
        margin-top: 15px;  
        text-align: center;  
        text-decoration: none;  
        color: #0066cc;  
        font-size: 14px;"  
      >Enter as a Visitor</a>  
    </div>  
  </div>
```

CSS + JAVASCRIPT + HTML

CONCLUSION

In conclusion, the Homework Reminder platform serves as a vital tool for academic success by addressing a critical challenge in students' daily routines. Forgetting assignments does not only lead to lower grades; it also creates unnecessary stress and can damage the trust between students and teachers through excuses or dishonesty. By automating reminders, our system promotes accountability, helps students maintain high academic performance, and fosters a more honest and organized educational environment.

THANK YOU
